

AQX HyperView

DATA SHEET

Actionable Business Intelligence

HyperView™ allows you to analyze, visualize, and report on your private IP data stored in AQX as well as the publicly available patent data from AcclaimIP. HyperView dashboards comprise a set of dynamic charts, graphs, and tables that provide a variety of ways to slice and dice the data. Move beyond simple reporting and explore the data; just one session in HyperView delivers more insight than dozens of traditional reports.

Build Your Own Beautiful Dashboards & Reports

With HyperView, you no longer need to rely on database gurus or reporting experts to create beautiful dashboards and reports. AQX ships with a set of Standard Dashboards that are easy to install and configure during the implementation process.

AQX HyperView is a fast and easy to use web-based analytics and business intelligence tool that helps you create dynamic, interactive dashboards and reports that leverage AQX's powerful private IP database and AcclaimIP's public data. HyperView provides critical insight into your internal operations and external IP landscape to manage your IP portfolio, drive efficiencies, and develop a competitive advantage.

- Provide insight to the entire organization - from docketers to IP leaders
- Monitor services, filing fees, annuities, renewals, and other costs
- View patent and trademark filings by country
- Track IP staff productivity
- Visualize your portfolio to ensure alignment with the business
- Analyze publicly available patent data from AcclaimIP

Moreover, with basic skills and a few minutes, you can create your own custom dashboards that traditionally took hours to generate. No more requests to IT, no more pulling data into spreadsheets – no more waiting for answers. Additionally, it's easy to share dashboards with other users or schedule emailed reports to stakeholders.

Engineered for Speed

HyperView is an award-winning, big data business intelligence tool that delivers unparalleled speed, performance, and handles ad-hoc queries with ease. Whether you're analyzing your private data or over 2 billion rows of public AcclaimIP data, concurrent ad-hoc queries return results in seconds. You no longer have to prepare data for reports or analysis. Filter the reports based on any criteria and explore the data to get instant answers and actionable intelligence.

ANAQUA HyperView puts the power of IP data into your hands

Access charts, graphs, and entire dashboards right from AQX and include visualizations in your home page for quick access to data and information. With the ability to slice and dice your data in different ways, you can better understand how your IP operation is performing. Report on a range of metrics on a global basis from portfolio status and distribution to inhouse and outside counsel performance and responsiveness. You have the ability to view your complete portfolio or any subset through easy-to-use filters. Views can include:

- Pie Charts
- Geographic Area Maps
- Pivot Tables
- Scatter Charts
- Calendar Heat Maps
- Line Charts
- Treemap
- And more
