

Foreign Filing Service for AQX® Corporate

DATA SHEET

The main objective of any business is to grow – and growing globally is often a critical aspect of any strategy. To support growth, filing in key markets across the globe for patent protection can help protect an invention, defend against a competitor, gain exclusive market share for a product, or generate revenue through licensing.

Anaqua makes foreign filing efficient and effective by streamlining the way IP teams manage their international patent applications. It has never been easier to manage your global patent portfolio and collaborate with trusted law firms in the countries where you want to protect your patents - while saving on the total foreign filing cost.

Rely on Anaqua's Foreign Filing Service to save you money and reduce administrative burdens.

With **Anaqua Foreign Filing Service**, you can determine which cases to work on and we will handle the translation and national phase filing of the PCT applications, the validation of your European granted patents, Unitary Patents and direct filings via the Paris Convention.

Foreign Filing made efficient:

- **Streamline the way you handle international patent applications**
We will act as a single point of contact, eliminating the need to deal with multiple foreign agents and translation providers.
- **Make it easy to monitor your global patent portfolio**
Make informed decisions directly in AQX and with a click of a button transfer orders in bulk to our foreign filing team.
- **Connect with trusted law firms worldwide**
Use of global network of agents or continue working with your preferred partners while we handle the administration, including translations.
- **Reduce costs**
We save our clients typically 25-45% of the overall costs of the foreign filing process.

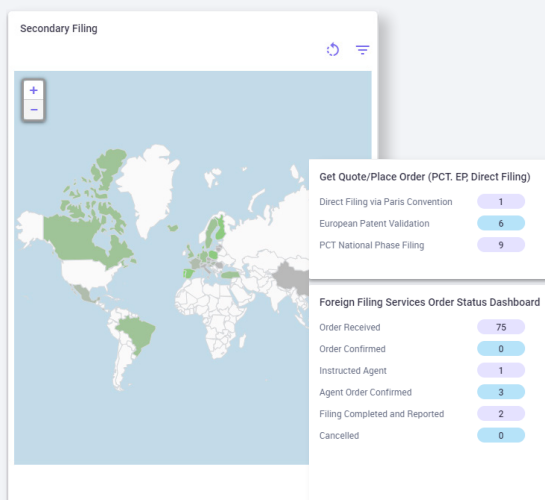

ANAQUA'S FOREIGN FILING SERVICE

Streamline and automate foreign filing processes with services integrated in AQX.

Work in AQX, the central workspace, for any activity related to foreign filings:

- select your preferred agent
- get instant quotes per country, including translation, official and service fees
- place orders in bulk to our foreign filing team in real time
- automatically link documents to the instructions
- track the end-to-end progress of the filing on your home page
- view itemized invoices
- make smart decisions with the analytics, competitor insights and technology view provided by AQX

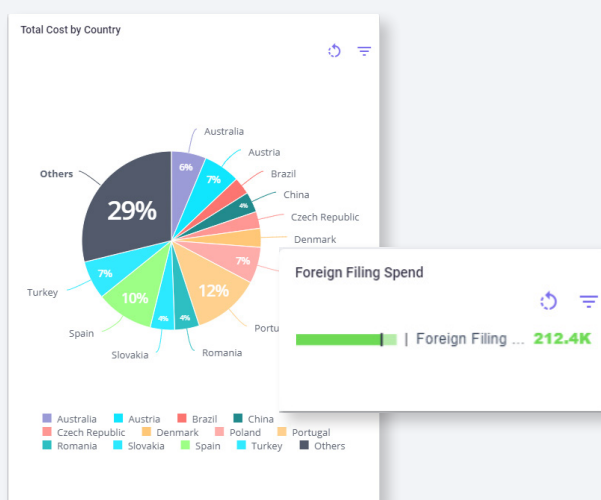

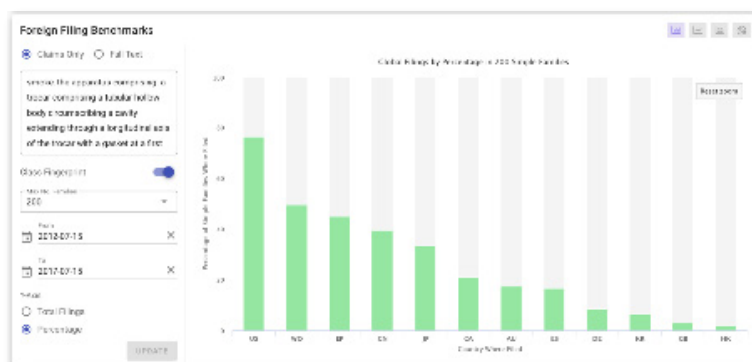

Monitor Your Global Patent Portfolio

The AQX Foreign Filing Workspace helps you visualize the foreign filing process end-to-end. View the status of your cases per territory on your home page.

Determine Where Global Protection is Needed

The Foreign Filing Report in AQX helps you surface any issues with your priority filing prior to making secondary filing decisions. Analyze claims and benchmark related patents and where they have been historically filed.

Generate Costs and Budget Effectively

AQX provides seamless integration with translation and filing services that deliver instant quotes. You can budget effectively and give your peers visibility into past and upcoming filing costs.
