

## Anaqua Services for Law Firms

DATASHEET

Anaqua provides a variety of Intellectual Property and business services to enhance your solutions offering and drive more value for your firm.

Anaqua's world class services support your firm's needs, so that you can focus on effectively partnering with your clients. Regardless of the size and scope of the project, Anaqua can scale with you to meet your requirements. Services solutions can be accessed through Anaqua's AQX® software, PATTSY WAVE, or our portal.

### Recurring Support Services

IP is a cyclical business that requires numerous repetitive activities. Anaqua provides a full complement of services to augment and elevate your firm's recurrent work.

#### Patent Annuities & Trademark Renewals

Anaqua's industry leading ISO 9001 certified process delivers consistent quality and dependable annuities and renewals payment services. We support portfolios of any size and deliver value-added, integrated payment services, and cost savings through our volume of work.

- Reduce invoice volume and save time in accounting
- Report on upcoming payments and consider pruning options for your clients
- Save time and reduce risk through using a single supplier

### Transactional Support Services

Your client needs are not always predictable: you can rely on Anaqua to support your team as demand changes. We tailor our transactional services delivery to your needs with Anaqua best practices, unique processes, and delivery methods.

#### Title Updates

Managing the number of updates required for even a single patent or trademark can be time consuming and complicated. Anaqua's Title Update service ensures title updates are timely and complete.

- Engage a high-value, global agent network

### ANAQUA SERVICES FOR LAW FIRMS

We offer a wide array of services for law firms, including:

- Patent Annuities & Trademark Renewals
- Title Updates
- IDS Creation
- Search Services
  - Collaborative Patent Search
  - Evidence of Use Analysis
- Foreign filing

- Reduce administrative overhead
- Single point of contact to coordinate all agents and ensure consistent updating based on jurisdictional requirements

## Services Tailored to your Law Firm's Specific Needs

### IDS Creation

IDS creation is a highly repetitive and often time-consuming process for the modern IP law firm. Anaqua IDS creation services can be used as either a supplement to a firm's internal docketing team or an outsourcing option.

### Search Services

Every IP law firm has unique patent search needs to support their clients' acquisition, licensing, and enforcement activities. We developed our own system for patent searching that's unique to the market and brings you a better service.

## Collaborative Patent Search

Collaborative Patent Search™ is a unique, process-driven search methodology that consistently delivers the highest quality results from experienced search engineers and scientists following a detailed, structured process.

Anaqua provides several patent search options. Each option produces specific results tailored to support your firm's prosecution, licensing, and enforcement practices.

Our options include:

- Patentability Searches
- Freedom to Operate Searches

- Invalidity Analysis
- Infringement Analysis
- Claim Chart Preparation

## Evidence of Use Analysis

Evidence of Use helps in determining the extent of overlap of claims of a patent onto a product. Evidence of Use provides a textual and graphical comparison between the claims of a patent and a product, which aids in easy and objective determination of extent of overlap between the two. Anaqua can develop EOU to support your firm's projects in the following areas:

- Potential Infringement
- Licensing
- Potential Litigation
- Patent Value Indication
- Technology

## Foreign Filing Services

Anaqua works with one of the largest networks of law firms and local agents in the world. Save time and rely on Anaqua for your clients' international patent filings:

- National PCT phase
- European patent validation
- Direct filing

We also offer a reciprocity model.
